Job Title	Software Engineer
Department	Software Engineering - Exempt
Location	Fairport, NY

COMPANY OVERVIEW AND RESPONSIBILITIES

Come and work for the Second Fastest Growing Company in Rochester, NY!

RailComm is a leading software solutions provider for the rail industry, working with freight, transit and industrial markets. Our flagship product, Domain Operations Controller (DOC®) System, is changing the way the rail industry operates by improving efficiency and safety.

As a Software Engineer, you will design, code, test, and debug mission/safety critical client and server-side cloud and enterprise systems. You will be responsible for enhancing the existing system and have the opportunity to design and develop new functionality. Working closely with our Quality Assurance department you will ensure that our system operates in a robust, reliable, and safe manner.

RailComm encourages a fun and entrepreneurial environment, offering significant career growth opportunities. We provide our employees with the opportunities to learn new technologies, improve skills, and take responsibility for their work.

REQUIREMENTS

Must have the following:

- Visual C++, Visual C#
- Experience working with SQL based databases
- Strong testing and debugging skills
- Ability to interact positively and effectively with customers and prospects
- Thorough documentation skills

EDUCATION REQUIREMENTS

- Degree in Software Engineering, Computer Science, Computer Engineering, or other related field

PREFERRED EXPERIENCE

- Familiar with software design patterns
- Experience developing client-server applications
- Experience debugging complex client-server applications
- Experience working with TCP/IP and serial communications
- Experience working with WPF
- Ability to travel if required

Excellent benefits included! Looking for energetic team players!

While this job description is comprehensive, job requirements are expected to change as the company's needs grow and change.

RailComm is an equal opportunity employer
