

## Troy Haworth Joins RailComm as Vice President of Sales

Nov 6<sup>th</sup>, 2015 - RailComm is pleased to announce and welcome Troy Haworth as the company's Vice President of Sales. Haworth will apply his extensive sales experience to lead the sales team and drive business growth and market share.

Commenting on the announcement, Joe Forgione, President & CEO said, "We are excited to welcome Troy Haworth to our team. Troy will be focused on expanding our existing markets as well as developing the market for our latest smart monitoring and analytics platform. Troy will be a dynamic addition to our management team."

"I'm very excited to be part of RailComm and to help the organization achieve new levels of visibility and collaboration to grow revenue and maintain its leadership position in the industry", said Haworth. "I intend to work with our internal teams and customers to ensure that our portfolio and newest developments are strongly represented across all markets."

Troy Haworth has over 20 years of experience in all areas of sales strategy and management for computer software, telecommunications, and IT technologies and services. Prior to joining RailComm, Haworth held various sales and management positions in the technology sector, including GT Software, Rx Networks, Aepona, and IntelliOne Technologies. Haworth earned a B.A. in Communications from Georgia State University.

### **About RailComm**

RailComm provides railroads and rail-served industrials with software-based solutions that are focused on train control and railroad management. Our state-of-the-art solutions automate an ever-expanding network of connected devices that generate real-time information which we then collect and analyze to coordinate and optimize the rail infrastructure. Our software solutions can be deployed on-site, or through an industry leading cloud/SaaS program. RailComm's solutions are installed on Class I railroads throughout North America, as well as on many Passenger Rail, Short Line and Regional railroads, Ports and Industrials. Our solutions have been instrumental in providing sustainable operating efficiencies and safety performance around the globe. To learn more, visit [railcomm.com](http://railcomm.com).
